NORTHERN ABITIBI ACQUIRES CARIBOO GOLD PROPERTY IN BRITISH COLUMBIA

Northern Abitibi Mining Corp. ("Northern Abitibi or the Company") is pleased to announce it has staked the Cariboo Gold Property located in central British Columbia.

The Cariboo Gold Property is 30 kilometres southeast of Quesnel, B.C. with good road access, located in the heart of the Cariboo gold fields which have produced several million ounces of gold from both placer and lode deposits. Major deposits located south and southeast of the Cariboo Gold Property include the QR Mine, the Gibraltar Mine, the Mt. Polley Mine, and the Spanish Mountain and Woodjam projects.

The Cariboo Gold Property has seen significant historic exploration including geophysical and geochemical surveys and drilling. The property is known to contain gold skarn style mineralization similar to the nearby QR deposit, along with epithermal Au mineralization. Historic drilling has also encountered high temperature potassic alteration along with intrusive rocks and breccias indicating potential for Cu-Au porphyry style mineralization.

Historic drilling by Placer Dome and Cross Lake Minerals encountered strong gold mineralization including intercepts of 11 metres grading 1.41 g/t Au, 6 metres grading 2.18 g/t Au, 6 metres grading 1.72 g/t Au, and individual assays up to 4.5 g/t Au. An induced polarization geophysical survey conducted in 2003 for Cross Lake Minerals defines an area 800 metres by 350 metres with anomalous chargeability that remains open to the southwest, west and northeast, with a coincident resistivity high that is 200 metres by 500 metres and appears open to the west and northeast. The known mineralized zones have not been fully drill tested or delineated and significant geophysical and geological targets on the property remain untested.

The Company will continue to evaluate and interpret all available historic exploration data from the Cariboo Gold Property and design an appropriate exploration program for the summer of 2015.

Ches Property Option Terminated

After a thorough review of the 2014 exploration results the Company has returned the Ches property to the Vendors and terminated the option agreement.

About Northern Abitibi Mining

Northern Abitibi Mining Corp. is a Canadian Junior Exploration Company with an experienced exploration team that is focused on identifying, acquiring and developing high potential North American exploration projects in a timely, responsible and cost-effective manner. The Company continues to actively search for new early stage exploration opportunities and avenues for growth in stable jurisdictions within North America. Additional opportunities in Mexico, Nevada, and Canada will continue to be evaluated and pursued during 2015. The Company owns 11 million shares of Spruce Ridge Resources Ltd. (22.7%) which owns the Viking Gold Project located in Newfoundland and Labrador.

Dr. Shane Ebert, P. Geo. is the Qualified Person responsible for the preparation of this news release.
